[My Trailhead Profile](#)

A dedicated worker with a strong work ethic and commitment to supporting the success of my employer and fellow workers. Demonstrated background working in a variety of responsible capacities. A skilled troubleshooter who is detailed-oriented and can rapidly identify work challenges, formulate solid plans, and create quality solutions in challenging and diverse work environments.

Skills: Apex, VisualForce, SOQL, SLDS, HTML5, CSS3, JavaScript, jQuery, React, Heroku, SQL, Node, Express, Bootstrap, Bamboo, Git, & Jira/Confluence.

Experience: Salesforce Developer, *Infosys Ltd.* Phoenix, AZ 09/17-Present

- Design, implement, test, deploy, and document code configurations on the Salesforce ecosystem to complete business requirements through Visual force pages and Apex logic.
- Develop and maintain out of the box functionality with validation rules, formulas, workflows rules, approval processes, process builders, and reports and dashboards.
- Coordinator to the offshore dev & onsite team to keep communication and requirements in sync.
- Responsible for planning & creating documentation for bi-weekly sprint deployment releases and testing new functionality in other environments before working with production team before we go live.
- Give demos of new design or functionality to the business owners at the end of every sprint.
- Provide technical assistance to troubleshoot bug fixes or enhancements to the end user.

Salesforce Developer Trainee, *Revature LLC* Herndon, VA 06/17- 08/17

- Trained in understanding and implementing configurations using out of the box functionality.
- Developed Visual Force Pages and logic through Apex code when built in functionality wasn't enough.
- Wrote scalable and efficient code by preventing governor limits and working my way around them.
- Built a survey app with a team of 4 that was compatible in both lightning and classic versions.

Web Development Immersive | Web Developer, *General Assembly* Manhattan, NY 11/16- 02/17

- Project 1: Snake game built with HTML, CSS, & JavaScript
- Project 2: CRUD Blog- Built with React, Bootstrap CSS, & Firebase API.
- Project 3: Healthify- Full Stack App built with Node/Express, Postgres, SASS, Passport, JavaScript-EJS, & D3.
- Project 4: in4- Front-end app that's built with React and Spotify API to render an artist's top 10 tracks and snippets of the track, and as well as album art.

Production Assistant, *Freelance* Manhattan, NY 06/14-09/16

- Managed communications between director and production team.
- Ensured that producers/directors had the necessary materials prior to editing/audio sessions or shoots.
- Prevented any unauthorized elements on the set, or any interference with the shooting process.
- Managed distribution of all production media including call sheets, scripts etc.
- Responsible for planning and organizing travel schedules, routes, and tickets for the production team.
- Performed all tasks, on and off set, as required by director or producer to their complete satisfaction.
